---

## END OF MEETING WITH DRINKS

---

## ABOUT EUROPEAN SPECIALIST NURSES ORGANISATION - ESNO

ESNO promotes and represents the interests of Specialist Nurses in Europe. Through collaboration with stakeholder organisations and utilising advanced science, we pursue recognition under the Directive of Professional qualification. We contribute to effective co-operation between health professionals, organisations, institutes and agencies, thus setting professional standards for education and continuing development.

ESNO implements long term strategies and policies to cohesively advance professional development and health projects in Europe. We achieve this through consultation with member colleagues and management associates. Through this cooperation we participate in a number of European Union institutions, forums and platforms, often with our partners in the health workforce.

Our network consists of a large variety of nursing field specialisations such as clinical work, research, education, leadership and standardisation in hospitals, community and universities. We, and our colleagues, consult and cooperate with healthcare professionals such as medical practitioners, pharmacists, occupational therapists, management and nursing associations in Europe and globally.

## ABOUT ADVANCED PRACTITIONERS NURSING NETWORK UNDER INTERNATIONAL COUNCIL OF NURSES (ICN/ANP)

The International Council of Nurses (ICN) Nurse Practitioner/Advanced Practice Nurse Network (NP/APNN) was established to provide an international resource for nurses practicing in the Nurse Practitioner (NP) or Advanced Practice Nurse (APN) roles as well as interested others such as policymakers, educators, regulators and/or health planners. These roles (NP/APN) apply to individual nurses who have been prepared beyond the basic education of a generalist nurse and who have the relevant experience and additional education and/or training that allows them to practice in an advanced role. The titles and credentials for these individuals vary around the globe but additional advanced education and/or training remains consistent.
