DAY 1 PRE-CONGRESS – HACKATHON

Thursday 4 June 2026

Mobilising Nursing Intelligence in Digital Health Transformation

Building on the April webinar, this Hackathon moves from reflection to action, focusing on nurses' formal roles in digital health. It highlights that the gap is not training, but real inclusion in design, governance, and implementation. Without decision-making authority, engagement stays passive. As a pre-congress event, it also offers an informal setting to connect with keynote speakers and participants, creating early momentum while contributing directly to the Hackathon's aims. It positions nurses across all levels as co-creators in AI, robotics, and data-driven care, embedding nursing intelligence in digital transformation at institutional, national, and European level.

08.00 - 09.00	Registration and setting up the event
09:00 - 09:30	Opening & Framing: From Webinar Insights to Operational Activation, why nurses move from training to governance
